On Oct 30, 2003 this sequence version replaced gi:15208427.
The orientation of the sequence of this BAC clone was generated by combining Monsanto and RGP-Japan sequencing data.

Allen SM, Rafalski JA; WPI; 2003-102520/09. P-PSDB; AA026533. Novel ammonium transporter polypeptide useful for identifying enzymatic inhibitors, which is homologous to corn, soybean, wheat or rice ammonium transporter polypeptides.

Claim 3; Page 13-14; 27pp; English.

The invention relates to a novel ammonium transporter protein comprising 90% homology based on the Clustal method compared to: a corn ammonium

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       à
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     g
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            ò
transporter polypeptide of 183 or 63 amino acids; a soybean ammonium transporter polypeptide of 500 or 486 amino acids; a wheat ammonium transporter polypeptide of 494 or 470 amino acids; and a rice ammonium transporter 497 amino acids fully defined in the specification. The isolated polymucleotide that affects the level of expression of the ammonium transporter polypeptide in a plant cell. The ammonium transporter protein gransporter polypeptide in a plant cell. The ammonium transporter protein situ in cells or in vitro in cell extracts, and as transporter protein in situ in cells or in vitro in cell extracts, and as transporter protein in situ in cells or in vitro in cell extracts, and targets to facilitate design and/or identify inhibitors of the enzymes that are useful as herbicides. The isolated polynucleotide is present at higher or lower levels than normal, and for designing and producing primer pairs which are useful in amplification or primer extension reactions. This polynucleotide sequence represents the cDNA encoding a soybean high affinity ammonium transporter protein of the invention
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     180
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            240

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               8
                                                                                                                                                                                                                                                                                                                                                                                                                                                                     The invention relates to a novel ammonium transporter protein comprising 90% homology based on the Clustal method compared to: a corn ammonium transporter polypeptide of 183 or 63 amino acids; a soybean ammonium transporter polypeptide of 500 or 486 amino acids; a wheat ammonium transporter polypeptide of 494 or 470 amino acids; and a rice ammonium transporter polypeptide of 494 or 470 amino acids; and a rice ammonium colated polynucleotide that affects the level of expression of the ammonium transporter polypeptide in a plant cell. The ammonium transporter protein a plant cell. The ammonium transporter protein a plant cell or in vitro in cell extracts, and as transporter protein in situ in cells or in vitro in cell extracts, and as transporter protein in situ in cells or in vitro in cell extracts, and as transporter protein as herbicides. The isolated polynucleotide is also useful for creating transgenic plants in which the polynucleotide is present at higher or lower levels than normal, and for designing and producing primer pairs which are useful in amplification or primer extension creations. This polynucleotide sequence represents the cDNA encoding a contract of the collaborations.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   253
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          TITICOGCCIACCIOGITITITICIATGCAGCITCGCCITCGCCATGCTCTGCGCCGGCTCC 293
